

15/01/25

Hackathon 03

(Day 01)

Slap One! Marketplace:-

Furniture website is a niche-e-commerce platform specializing in furniture. This platform offers personalised options, high-quality visuals, and seamless delivery services.

My marketplace type is niche-e-commerce.

Slap Two! Business goals:-

What problems does your market-place aim to solve?

My marketplace aims to solve problems for both customers and sellers. Here are some specific issues it addresses:

1. Access to Quality Product:-
Making it easier for customers to find reliable and high-quality

product.

2. Convenient Shopping Experience:-

Providing a seamless and user-friendly platform that saves time and effort.

3. Personalisation:-

Offering options tailored to the specific needs and preferences of customers.

4. Transparent Pricing:-

Ensuring clear and competitive pricing for every product.

5. Reliable Delivery:-

Guaranteeing safe delivery of products.

6. Seller Support:-

Providing an efficient way for sellers to showcase their product and reach customers.

By solving these problems, the marketplace aims to become a trusted and user-friendly platform.

Step Three!

Data Schema:

- Product

- Product Id,
- Name
- Stock
- Tags
- description
- Price
- Review

- Order

- Order Id
- Product Id
- Status
- Quantity
- Price

Customer

- Customer Id
- Name
- Email
- Address
- Phone no

- Shipment

- Shipment Id
- Order Id
- Delivery date
- Status
- Tracking No

- Delivery

- Long name
- Assigned drivers
- Charges
